Job Description

The Project Manager Engineer role is an opportunity to join a growing project management and engineering solutions provider, where you will lead end-to-end project execution across construction and integrated building services, ensuring projects are delivered on time, within budget, and to the highest quality and safety standards.

Responsibilities

- Plan, manage, and monitor project schedules, budgets, and overall progress to ensure successful delivery.
- Coordinate closely with clients, consultants, subcontractors, and internal teams for seamless execution.
- Prepare and maintain accurate project documentation, reports, and timelines.
- Ensure compliance with safety regulations, industry standards, and internal procedures.
- Identify project risks and implement proactive mitigation strategies.

- Oversee on-site activities and resolve technical or operational issues promptly.
- Ensure project deliverables meet required quality standards and specifications.

Requirements

- Bachelor's Degree in Engineering, Architecture, or a related field.
- 6–8 years of project management experience, preferably within construction (CSA or M&E).
- Strong leadership, coordination, and problem-solving capabilities.
- Proven ability to manage multiple projects within tight timelines.
- Good communication skills in English and Bahasa Malaysia.
- Familiar with project scheduling tools and site operations.
- Willing to travel to project sites as required.

About the Company

Our client is a reputable and fast-growing provider of project management and engineering solutions, specializing in construction and integrated building services. The organization is committed to delivering projects with excellence, safety, and efficiency, supported by a strong team of professionals and a track record of successful project execution across various industries.
