### Job Description

#### Company and Job Overview

- An established IT solutions and system integration provider.
- The company specializes in IT infrastructure, cloud services, networking, and system development, helping organizations design, implement, and maintain reliable IT environments.
- You'll gain hands-on experience in networking, cloud (Microsoft 365), cybersecurity, and system deployment, while working closely with senior engineers and clients.

#### Job Responsibilities

##### IT Support & Operations

- Provide technical support (L1 & L2) to customers and users

- Troubleshoot issues (network, servers, cloud, M365, security)
- Perform system maintenance, monitoring, and documentation

### **Project Implementation**

- Assist in deploying and configuring IT systems
- Support system integration projects (servers, networks, cloud, apps)
- Help with testing, documentation, and post-go-live support

### **Onsite Support**

- Travel to client sites for installation and troubleshooting
- Conduct site surveys and assist with infrastructure setup
- Coordinate with vendors, contractors, and customers

### **Network & Infrastructure**

- Support setup of routers, switches, firewalls, WiFi, VPN
- Learn and apply networking concepts (IP, VLAN, security)
- Assist in maintaining secure and scalable environments

### **Continuous Learning**

- Build skills in cloud, networking, cybersecurity, virtualization
- Participate in training, R&D, and internal improvements

### **Job Requirements**

- Diploma/Degree in IT, Computer Science, or related
- 1–3 years experience in IT support / networking / system admin
- Fresh grads with strong skills or projects are welcome

### **What You'll Gain**

- Exposure to real-world IT projects across industries
- Hands-on experience in cloud, networking, and system integration
- Career growth towards Senior Engineer or specialist roles
