### Job Description

**Senior Security Engineer Role Overview**

My client is looking for an experienced **Senior Security Engineer** to support cybersecurity assessment, solution design, and implementation initiatives within a dynamic and client-facing environment. This role involves working closely with stakeholders to identify security risks, recommend practical solutions, and deliver end-to-end cybersecurity projects.

The ideal candidate brings a strong balance of technical expertise and consulting capability, with the ability to translate complex security challenges into clear, actionable recommendations aligned with business needs.

**Key Responsibilities**

- Conduct comprehensive security assessments to identify risks, vulnerabilities, and gaps, and recommend practical remediation plans.
- Support the design, evaluation, and implementation of cybersecurity solutions such as EDR, SASE, Zero Trust, and endpoint/network security controls.
- Participate in proof-of-concept activities, vendor evaluations, technical workshops, and stakeholder discussions.

- Prepare detailed assessment reports, technical documentation, and presentation materials.
- Collaborate with stakeholders, internal teams, and vendors to ensure timely and successful project delivery.
- Stay current with emerging cybersecurity threats, technologies, and best practices to continuously improve service quality.

**Required Qualifications & Experience**

- Degree in Information Technology, Cybersecurity, Computer Engineering, Computer Science, or a related field.
- Minimum 5 years of experience in cybersecurity, security engineering, security assessment, solution implementation, or cybersecurity consulting.
- Proven experience in security assessment, gap analysis, risk identification, and remediation planning.
- Experience working with stakeholders in consulting, project delivery, or advisory roles.

**Technical Skills**

- Hands-on experience in one or more areas such as EDR, SASE, Zero Trust, endpoint security, network security, cloud security, vulnerability management, or security governance.
- Strong ability to evaluate cybersecurity risks and convert technical findings into practical, business-focused recommendations.
- Ability to communicate complex security concepts clearly to both technical and non-technical audiences.

**Preferred Qualifications**

- Experience with Cato Cloud or similar SASE platforms.
- Familiarity with security frameworks such as NIST Cybersecurity Framework, CIS Controls, or ISO/IEC 27001.
- Knowledge of infrastructure and networking fundamentals, including firewalls, VPNs, routing, Active Directory, Microsoft 365 security, and cloud connectivity.
- Relevant certifications such as CISSP, CISM, CISA, Security+, CySA+, GIAC, Microsoft Security, AWS Security, Azure Security, or other vendor certifications.
- Japanese language proficiency or experience working with Japanese stakeholders in a regional environment.

**Key Attributes**

- Strong analytical and problem-solving skills with attention to detail.
- Consultative approach with the ability to understand customer requirements and propose practical solutions.
- Ability to work independently, manage multiple priorities, and deliver high-quality outcomes.
- Proactive mindset with a strong commitment to continuous learning and professional growth.
