Job Description

【Over view】

A Japanese manufacturer company planning to hire a Field Engineer for our European office. These products are used across a wide range of industries, including automotive, aerospace, electronics, and semiconductors, and play a critical role from the product development stage through to quality assurance. In this position, you will serve as a key member of our sales and service network across Europe, providing end to end solutions. This includes proposing customized solutions based on customer requirements, offering technical support, and delivering after-sales services such as installation support and maintenance.

【Job Responsibilities】

- Consulting with customers to assess needs and propose optimal product configurations (via email, online meetings or on-site visits)
- Preparing 2D and 3D technical drawings based on customer requirements.
- Creating technical documentation such as specifications

- Performing performance calculations to ensure compliance with customer needs and test standards.
- Conducting feasibility studies and test runs at our Technology Center in Düsseldorf
- Coordinating specifications with our factories in Japan, USA and China.
- Providing technical guidance to Sales and other internal departments
- Supporting chamber commissioning and modifications

【JOB REQUIREMENTS】

- MS Office
- Valid driver's license
- Experience with CAD
- English required / German is a plus
