Job Description

Position: Solution Architect

Location: London

Contract: 6 Months Initially

Pay: £600 Umbrella/day

Company: Leading provider of IT services to one of the major Japanese banking group in the EMEA region, supporting one of Japan's largest banks and a global financial powerhouse.

About the Role: Responsible for overseeing architectural standards across the company's Development Team

Key Responsibilities:

- Create and improve architectural standards for on premise and azure cloud software products, develop cloud migration procedures and guidelines.

- Assist in cloud migration projects, assess readiness and dependencies, optimize for the Cloud.
- Create and review blueprints for software products, provide guidance on improving architecture.
- Coding mission critical parts and performing code reviews.
- Assist on integrating AI technologies to improve existing systems.

Other Tasks:

- Ensure that applications are in line with compliance and regulatory standards and conduct regular security assessments of these applications.
- Technical writing (creating related documentation)
- Assist developers with any architecture related issues and queries. This may extend to troubleshooting issues in company's applications and liaising with the relevant support teams such as other Development team sections, Technical Support, Network and Infrastructure and DBAs

We regret that only applicants who pass the document screening process will be contacted.

Notice: By submitting an application for this position, you acknowledge and consent to the disclosure of your personal information to the Privacy Policy and Terms and Conditions, for the purpose of recruitment and candidate evaluation.
