Job Description

OVERVIEW

A global telecommunication and radio technologies provider with advanced systems and solutions in a variety of product lines in diverse industries. Now expanding their business in DACH countries.

KEY REQUIREMENTS:

- Experience and knowledgeable in radio communication, telecommunication or electronics engineering.
- Business German and English communication skills
- Able to work 100% on-site

JOB RESPONSIBILITIES:

- Provide two-way radio products after-sales services and technical support to customers; for example diagnose and repair faults, commissioning, troubleshooting, calibration, etc. to component and equipment levels
- Identify complex technical problems/errors by reading comprehend circuit, layout, and block diagrams and using signals and test sets to diagnose radio frequency, control, power and TTL circuit-based defections and faults
- Maintain accurate records of service activities, including service reports, equipment history, and inventory management

JOB REQUIREMENTS:

- Being able to diagnose and repair faults to component level
- Familiar with digital radio communications: IFR, IP Networks and associated technologies (Tier III, MPT1327, DMR, GSM, 3G, LTE,GPS, and bluetooth) and equipment
- Hands-on attitude and willing to learn radio technology
- Eligible to work in the EU

BENEFITS:

- 25 days of annual leave
- Additional health insurance
- Laptop and mobile phone will be provided
