Job Description

Join a high-impact engineering team to build, automate, and scale cloud-native infrastructure in a fast-growing digital environment. You will drive DevOps best practices, enabling reliable, secure, and highly available platforms used by a global user base.

Client Details

Our client is a large-scale, globally recognized technology and internet services organization operating multiple high-traffic platforms. The company fosters an international work environment and emphasizes innovation, scalability, and engineering excellence.

Description

- Design, build, and maintain scalable, secure, and resilient cloud infrastructure
- Implement and manage CI/CD pipelines to streamline delivery and deployment
- Automate infrastructure provisioning using IaC tools (e.g., Terraform, CloudFormation)
- Monitor system performance, reliability, and availability; proactively resolve issues
- Collaborate with software engineers to enable efficient, reliable releases
- Enhance observability using logging, metrics, and alerting systems

- Ensure security best practices across infrastructure and deployment processes
- Support incident response and implement continuous improvement measures

Job Offer

- Opportunity to work in a global, English-only engineering environment
- Exposure to large-scale, high-traffic systems and modern cloud technologies
- Collaborative culture with strong engineering standards and innovation focus

To apply online please click the 'Apply' button below. For a confidential discussion about this role please contact Serena Wu on +81 3 6627 6137.

Required Skills

- 7+ years of experience in DevOps, SRE, or infrastructure engineering
 - Strong experience with cloud platforms (e.g., AWS, GCP, or Azure)
 - Hands-on expertise with CI/CD tools and automation frameworks
 - Experience with containerization and orchestration (Docker, Kubernetes)
 - Solid scripting or programming skills (e.g., Python, Bash, or Go)
 - Strong understanding of monitoring, logging, and system reliability practices
 - Experience working in large-scale, distributed systems environments preferred
 - Strong communication skills in English (spoken and written); Japanese not required
 - Open to overseas candidates
-
