#### Job Description

Join a high-performing technology team building and enhancing Java-based applications that support key financial services. This role offers the opportunity to work closely with international stakeholders while developing robust, scalable systems.

#### Client Details

Our client is a leading global securities and investment services firm with a strong presence in Japan and international markets, known for its advanced technology platforms and complex financial operations.

#### Description

- Design, develop, and maintain Java-based applications supporting financial systems
- Collaborate with business stakeholders and global teams to define technical solutions
- Troubleshoot and resolve system issues to ensure stability and performance
- Participate in system upgrades, enhancements, and ongoing optimization
- Contribute to code reviews, documentation, and best practices within the team
- Ensure systems meet regulatory and security standards relevant to financial services

**Job Offer**

- Opportunity to work at a globally recognized financial institution
- Exposure to complex, large-scale financial systems
- Collaborative and international work environment
- Career growth within a stable, high-impact industry
