### Job Description

**Position: Electrical Engineer****Qualification:**

- Bachelor's degree in Electrical Engineering.
- 3 year of experience in maintenance, electrical systems, automation, or manufacturing environments.
- Knowledge of electrical systems, motor control, PLC, and industrial equipment.
- Experience with troubleshooting (Siemens, Nidec, ABB, etc.).
- Knowledge of AutoCAD, SolidWorks, or electrical design software.
- Experience in preventive maintenance systems (PM/CMMS).
- Proficient in English.

**Job description:**

- Plan and execute preventive and predictive maintenance for electrical systems and production equipment.
- Troubleshoot and resolve electrical, automation, PLC, inverter, and control system issues.
- Analyze equipment breakdowns and implement corrective actions to improve reliability and reduce downtime.
- Monitor and follow up maintenance activities to ensure effective execution and machine availability.
- Support installation, modification, and improvement projects within budget and timeline.
- Supervise, coach, and develop maintenance technicians and contractors.

- Coordinate with Production and related departments to optimize operational efficiency.
- Ensure compliance with electrical safety standards, company policies, and continuous improvement initiatives.
- Provide technical support, knowledge sharing, and engineering guidance to plant personnel.
