Job Description

Job Responsibilities

- Plan and manage the entire Data Center project from concept development to final handover.
- Develop, organize, and control project schedule, quality, cost, and safety.
- Lead meetings with Clients, Consultants, Contractors, and other stakeholders.
- Coordinate and manage interdisciplinary work between CSA (Civil, Structural & Architectural) and MEPF (Mechanical, Electrical, Plumbing & Fire Protection).
- Resolve technical, operational, and on-site issues arising during project execution.
- Provide regular reports on project progress and status to the Board of Directors.
- Ensure the project is executed in compliance with the contract, technical standards, and legal regulations.

- Perform other tasks as assigned by the Board of Directors.

Job Requirements

- Bachelor's degree in Construction, M&E, Civil Engineering, or related fields.
- At least 8 years of experience in construction, including a minimum of 5 years in a Project Manager or equivalent role.
- Preferred candidates with experience in Data Center projects or large-scale industrial/factory projects.
- Strong understanding of coordination and management of both CSA and MEPF disciplines.
- Fluent in English (all four skills), with the ability to lead meetings and work directly with Clients, Consultants, and international partners. (Mandatory)
- Strong leadership, planning, and project management skills, including schedule, cost, quality, and risk control.
- Strong problem-solving skills, decision-making ability, and ability to work under high pressure.
