Job Description

POSITION TITLE Business Analyst

POSITION SUMMARY

In this position, you will lead business analysis and application support activities for counterparty credit risk (CCR) systems, acting as a key bridge between business and technology teams to enhance risk platforms, ensure production stability, and drive continuous improvement initiatives.

RESPONSIBILITIES

- Gather, analyze, and document business and technical requirements for CCR systems
- Support exposure management applications including PFE/EPE, limit monitoring, what-if pre-trade analysis, intraday risk calculations, and exposure reporting

- Create process flows, functional specifications, and data mapping documents
- Act as liaison between business stakeholders and technology teams
- Serve as a key point of contact for high-severity production incidents impacting exposure reporting, limit breaches, and regulatory deliverables
- Lead root cause analysis (RCA) for production incidents and ensure permanent resolution of recurring issues
- Drive continuous improvement and process standardization
- Support automation and operational efficiency initiatives
- Collaborate with global onshore/offshore teams
- Ensure compliance with regulatory, audit, and risk control requirements
- Define and track operational metrics such as system performance, data quality, and incident trends

QUALIFICATIONS

- Bachelor's degree in Computer Science, Information Systems, Finance, Mathematics, or a related discipline
- 12+ years of experience as a Business Analyst in financial services technology
- Strong experience in risk or exposure management systems
- Experience working in regulated environments
- Strong knowledge of counterparty credit risk (CCR) concepts
- Experience with derivatives, exposure calculations (PFE/EPE), and risk platforms
- Proficiency in SQL and data analysis
- Experience with BRD, functional specs, and test cases
- Familiarity with JIRA, Confluence, ServiceNow
- Understanding of SDLC, Agile, and change management
