Job Description

This role is for an iOS Developer responsible for building and maintaining mobile applications using Swift and MVVM architecture, integrating REST APIs, and ensuring high performance and reliability. The position involves collaborating with cross-functional teams in an Agile environment to deliver new features and enhancements for personal finance mobile services.

Client Details

This large organization operates within the Technology & Telecoms sector, offering innovative solutions and products to a global audience. Known for its advanced technological capabilities, the company prioritizes excellence and creativity in all its endeavors.

Description

- Design, develop, and maintain high-quality iOS applications using Swift, MVVM architecture, and modern development tools such as CocoaPods and Swift Package Manager.

- Collaborate with cross-functional teams to define requirements, build new features, integrate RESTful APIs, and deliver scalable mobile solutions.
- Ensure application quality and reliability through unit testing, code reviews, bug fixing, performance optimization, and adherence to best development practices.
- Participate in the full software development lifecycle within an Agile/Scrum environment, contributing to design, development, testing, deployment, and continuous process improvement.

Job Offer

- English based opportunity
- Free office meal provided
- 1 day work from home hybrid position

To apply online please click the 'Apply' button below. For a confidential discussion about this role please contact Serina Miyazono on +81 3 6627 6130.

Required Skills

- Bachelor's degree in Computer Science, Engineering, or a related field, with 6+ years of software development experience including 4+ years of hands-on Swift development for iOS applications.
 - Proven experience building and releasing production-grade iOS applications, with strong knowledge of MVVM architecture, iOS SDK, REST APIs, JSON, and version control tools such as Git.
 - Solid understanding of mobile application development best practices, including unit testing, CI/CD pipelines, code reviews, performance optimization, and the full software development lifecycle.
 - Strong communication, collaboration, and problem-solving skills, with the ability to work effectively in an Agile, multicultural environment and adapt quickly to new technologies and methodologies.
