Job Description

This is a senior-level opportunity to lead the design and development of scalable, customer-facing applications across web and mobile platforms. You will bridge front-end and back-end systems while mentoring engineers and shaping best practices in a high-impact environment.

Client Details

A large-scale, technology-driven organization in the digital services space, supporting millions of users through robust B2C platforms. The team focuses on delivering high-quality system development aligned with business and executive priorities.

Description

- Design, develop, and maintain front-end (React.js, React Native) and back-end (Spring Boot, Java, Redis) components
- Build reusable components and scalable front-end libraries
- Translate UI/UX designs and wireframes into high-quality, production-ready code
- Architect system structures, APIs, and database schemas for performance and scalability
- Optimize application performance across devices, browsers, and environments
- Collaborate with Product Managers and designers to deliver seamless user experiences

- Drive best practices in development and provide mentorship to junior engineers
- Manage integrations, APIs, and system environments to ensure reliability

Job Offer

- Opportunity to lead architecture and system design in a senior role
- Exposure to large-scale, high-traffic digital platforms
- Collaborative, cross-functional international team environment

To apply online please click the 'Apply' button below. For a confidential discussion about this role please contact Serena Wu on +81 3 6627 6137.

Required Skills

- 7-10 years of experience in front-end or full-stack development
- Strong proficiency in JavaScript and TypeScript
- Solid experience with React.js and React Native
- Hands-on experience with Spring Boot (Java) and Redis
- Familiarity with RESTful APIs and modern authentication (e.g., JWT)
- Experience with state management tools (Redux, MobX)
- Proficient with Git or similar version control systems
- Strong problem-solving ability and troubleshooting skills
- Bachelor's degree in Computer Science or equivalent experience
- Business-level English or above

Preferred:

- Experience with GraphQL or Node.js
- Understanding of Agile methodologies
- Contribution to open-source or active GitHub presence
