Job Description

Lead the design, development, deployment, and reliability of scalable backend systems and microservices across the full software development cycle. Requires strong experience in Java, Kubernetes, Docker, and cloud/distributed environments, with collaboration and mentoring responsibilities.

Client Details

The employer is a large organization in the retail industry, known for its focus on technological advancement and innovation. The company is committed to delivering exceptional solutions and services, creating a supportive environment for its employees.

Description

- Lead the end-to-end software development lifecycle, including requirements analysis, system design, development, testing, deployment, and production support.
- Design, build, and maintain scalable backend services and microservices using modern technologies and cloud-

native practices.

- Manage deployments, monitor application performance, troubleshoot production issues, and ensure platform reliability through DevOps/SRE best practices.
- Collaborate with cross-functional teams, participate in architecture and code reviews, and mentor junior engineers to drive technical excellence.

Job Offer

- Competitive salary
- Free meals provided at the cafeteria.
- An opportunity to work on cutting-edge technology projects within the retail industry.
- A supportive and collaborative work environment in Tokyo.

To apply online please click the 'Apply' button below. For a confidential discussion about this role please contact Serina Miyazono on +81 3 6627 6130.

Required Skills

- 8+ years of software development experience with a strong background in designing and building scalable backend systems and microservices.
 - Hands-on expertise with Java, Docker, Kubernetes, and cloud-based distributed systems in production environments.
 - Strong understanding of system architecture, DevOps/SRE practices, CI/CD, and application reliability.
 - Excellent communication and collaboration skills, with the ability to work across teams and mentor junior engineers.
