Job Description

Software Engineer specializing in payment platforms, responsible for designing, developing, and maintaining secure, scalable Java-based payment APIs and microservices. Collaborates with cross-functional teams to deliver high-performance payment solutions, optimize system architecture, and ensure reliability, security, and business alignment.

Client Details

This opportunity is with a large organization recognized for its innovative contributions to the Technology & Telecoms industry. The company offers a collaborative work environment and cutting-edge resources to support its employees in delivering impactful solutions.

Description

- Design, develop, test, and deploy Java/Spring Boot-based payment applications and RESTful APIs in a secure and scalable microservices environment.
- Collaborate with engineers, product managers, and stakeholders to deliver high-quality payment solutions aligned with

business and technical requirements.

- Monitor, troubleshoot, and optimize application performance, identifying bottlenecks and implementing improvements for reliability and scalability.
- Contribute to system architecture, code reviews, technical documentation, and continuous improvement initiatives while following software development best practices.

Job Offer

- Competitive salary
- Free meals at the cafeteria for all employees.
- Opportunity to work in a large organization within the Technology & Telecoms industry.

To apply online please click the 'Apply' button below. For a confidential discussion about this role please contact Serina Miyazono on +81 3 6627 6130.

Required Skills

- Proven experience in Java development, with strong hands-on expertise in Spring Boot, SQL, and RESTful API development.
 - Solid understanding of microservices architecture, software design principles, and secure coding best practices.
 - Ability to work effectively in an Agile, collaborative environment and communicate with both technical and non-technical stakeholders.
 - Business-level English skills and a proactive mindset for solving complex technical challenges in a high-performance, scalable systems environment.
-
