Job Description

Our client is a manufacturing company for household products which focuses on 3 core technological competencies: precision mold design, advanced material application development, and innovative injection molding techniques. Their Sg Petani facility embodies a fusion of traditional manufacturing excellence with modern smart technologies delivering high-quality production solutions from R&D stage through to final product realization.

Job Descriptions

- Plan, execute, and close projects on time and within budget.
- Project development is conducted according to customer requirements.
- Schedule project timelines, track project deliverables using appropriate tools, and provide direction and support to project team members.
- Coordinate QC measures to ensure project deliverables meet quality standards and client expectations.
- Identify, analyze, and mitigate project risks.
- Effectively communicate project expectations to team members and stakeholders timely and clearly.
- Resolve any issues and conflicts within the project team or between the project team and stakeholders.

Job Requirements

- Min Diploma or Degree in business, marketing, engineering or equivalent preferred.
- Min 5 years of related experience in project handling.

- Excellent written and verbal communication skills.
- Proficiency in Microsoft Project, Excel, Word, and PowerPoint.
- Strong analytical and problem-solving skills.
- Ability to think critically and solve complex problems.
