Job Description

Company and Job Overview

- Our client is a leading provider of Factory Automation components, Press Die components, Plastic Mold components, and industrial solutions, supporting manufacturers across various industries with innovative products and services.
- Location : Kuala Lumpur (Near Public Transport)

Job Responsibilities

- Design, develop, test, and deploy Robotic Process Automation (RPA) solutions using **UiPath** and **Microsoft Power Automate**.
- Analyze business processes and identify automation opportunities to improve efficiency and accuracy.
- Collaborate with business users to understand requirements and recommend effective automation solutions.
- Create and maintain technical documentation, process flow diagrams, and user guides.
- Monitor, troubleshoot, and enhance existing automation workflows.
- Participate in AI and intelligent automation initiatives, including OCR, document processing, and workflow

optimization.

- Ensure automation solutions comply with IT governance, security, and quality standards.
- Support users with automation-related issues and continuous improvement projects.

Job Requirements

- Bachelor's Degree in Information Technology, Computer Science, Software Engineering, or related discipline.
- Strong experience in UiPath RPA Development.
- Hands-on experience with Microsoft Power Automate.
- Advanced proficiency in Microsoft Excel.
- Excellent VBA Programming skills.
- Strong knowledge of Microsoft Access Database development.
- Experience in process automation, workflow design, and data manipulation.
- Good understanding of SQL and database concepts.
