Job Description

Company Overview

A company in the Software Products and Web Services industry is hiring for a Project Manager (Japanese Market, C#) position.

Job Description

- Lead project planning activities, including scope definition, WBS creation, budgeting, timeline management, resource allocation, and execution oversight.
- Coordinate and manage cross-functional teams of 10+ members, including Developers, QA Engineers, Business Analysts, and Infrastructure Engineers, ensuring effective performance and workload distribution.
- Monitor project schedules, manage risks and issues, handle requirement changes, facilitate project meetings, and provide regular progress reports to stakeholders.
- Define quality standards and acceptance criteria, oversee testing plans, control defects, and supervise release processes to ensure successful delivery.

- Collaborate closely with clients to gather and clarify requirements, align on solutions, manage project scope, and maintain stakeholder expectations.
- Participate in technical discussions, solution and architecture reviews, and support key technical decision-making throughout the project lifecycle.
- Apply Agile/Scrum or Waterfall methodologies, standardize project processes, and drive continuous improvement initiatives.

Qualifications

- Minimum 3 years of hands-on experience in Web or Application development.
- Strong technical experience with one or more of the following technology stacks:
 - C#, ASP.NET MVC, .NET Core, Entity Framework
 - JavaScript/TypeScript, Node.js, React, Next.js
 - PHP or other related web technologies
- At least 1 year of experience as a Project Manager, including management of teams with 10 or more members and responsibility for project quality, schedule, and customer requirements.
- Good understanding of Oracle and PostgreSQL databases, including SQL development and basic query optimization.
- Knowledge of AWS and core cloud services for infrastructure coordination and deployment support.
- Strong analytical thinking with the ability to understand business requirements and recommend effective technical solutions.
- Excellent leadership, communication, negotiation, planning, presentation, documentation, and risk management skills.
- Experience working with DevOps practices is an advantage.
- Japanese communication skills at JLPT N3 level or above are preferred.
- Experience working with Japanese clients is highly preferred.
