Job Description

Position: Electrical Design Engineer

Salary: 30,000 - 50,000

Location: Sathorn, Bangkok

Responsibility:
1. Cost Estimation & Analysis: Perform detailed project cost estimations by coordinating with procurement teams, internal factories, external vendors and subcontractors.
2. Technical Proposal Preparation: Prepare high-quality technical proposals documents that clearly define the scope of supply and equipment specifications
3. Review and prepare tender documents
4. Specification Review: Check and refine (brush up) electrical equipment specifications to ensure they meet customer requirements and international standards.
5. Preliminary Design & Drafting: Develop preliminary Single-line diagrams (SLD) for system

projects including HV/MV/LV Substations.
6. Draft preliminary substation layout plan drawing, ensuring optimal equipment placement for 115kV GIS Power Transformations (PTR), and 22kV/6.6kV Switchgear (SWGR) while adhering to safety clearances and technical standards.
7. Perform other job-related duties as assigned

Qualification:
• Male or Female, Age 25 - 35 years old.
• Bachelor's degree in electrical power engineer or related field
• At least 2 years of experience in Electrical System Design/Estimation/Sales within the power electrical field (HV/MV Substation focus)
• Good command in spoken and written English.
• Product knowledge of HV GIS, HV/MV Switchgear & Transformer, LV MDB/MCC/VVVF, and Protection relays.
• Have skills in AutoCAD operation for Single-line diagrams and ability to understand Equipment Layout drawing/Schematic diagram.
• Having knowledge skills in Electrical Design Software (ETAP) and Monitoring system (SCADA/CSCS) would be an advantage.
• Have a professional engineering license and driving license
• Excellent problem-solving and management skills
• Fast learning, patient, good attitude and can work under pressure.
