Job Description

Who are you:

1. An experienced software engineer with a strong passion in AI
2. You have strong problem-solving skills and experience
3. You are excited to work within a fast-growing environment

Why you should apply:

1. You will form part of one of the largest and most global AI teams anywhere in Japan.
2. You will work alongside a successful, global team of engineers
3. You can work flexibly in a hybrid environment
4. Great opportunities for career growth in a fast-growing company

Required Skills

Requirements:

1. 3 plus years of experience with either Python, Typescript or Go
2. Practical experience developing AI agents and working with context engineering
3. Business level Japanese
4. Foundation in language processing and experience with data pipelines
5. Experience building applications using LLM APIs
6. Experience designing and implementing RAG systems

Desired skills:

Experience designing and operating systems such as AWS, Google Cloud or Azure

Experience building and operating search infrastructure such as Elasticsearch, Opensearch, Vespa etc

Experience designing systems that integrate knowledge graphs or structured data with RAG

Experience pre-processing and normalising unstructured text data, such as customer emails, FAQs and product documentation

Company Description
