Job Description

COMPANY OVERVIEW

The client is a niche Singapore-based technology company that helps organizations turn vehicle and driving data into actionable insights, with a strong focus on mobility, safety, and risk analytics.

JOB RESPONSIBILITIES

- Design, implement, and maintain scalable AWS cloud infrastructure and architecture.
- Optimize cloud environments for security, performance, reliability, and cost efficiency.
- Develop and manage database schemas while improving complex SQL query performance.
- Build and automate workflows using AWS Step Functions.
- Establish and enforce cloud security best practices and architectural standards.

- Develop APIs and SDKs to support secure integration with external partners and clients.
- Collaborate with cross-functional teams to deliver innovative cloud-based solutions.

JOB REQUIREMENTS

- Bachelor's degree in Computer Science, Computer Engineering, Data Science, Information Technology, or a related field.
- Strong proficiency in Python programming.
- 2 to 3 years of proven experience designing and deploying solutions on AWS.
- Solid understanding of database design, data modeling, and advanced SQL queries.
- Knowledge of AWS cloud principles and the AWS Well-Architected Framework.
- Experience with AWS security services, Git, and GitLab.
- AWS certifications are advantageous.
- Exposure to AI/ML technologies and their integration into applications is a plus.
- Experience developing dashboards, internal tools, or data visualization platforms is preferred.
- Understanding of data analytics and machine learning concepts is beneficial.
