Job Description

Location: Singapore (Client Environment)

Employment: Long-term Project Engagement

Overview

Seeking an experienced Infrastructure Architect to partner with business and technology stakeholders within a highly regulated environment. The role will focus on designing and governing enterprise infrastructure solutions, ensuring alignment with security, compliance, cloud adoption and operational standards.

Key Responsibilities

- Lead infrastructure architecture discussions across cloud, network and security domains.
- Develop architecture artefacts, solution designs and technical governance documentation.
- Collaborate with project teams and business stakeholders to ensure successful technology delivery.
- Support compliance, risk management and infrastructure best practices within a regulated environment.

- Provide architectural guidance on cloud transformation and modern infrastructure initiatives.

Preferred Background

- Strong infrastructure architecture experience.
- Exposure to cloud platforms and enterprise security controls.
- Experience working within regulated or compliance-driven industries.
- Strong communication, stakeholder management and documentation skills.
- Familiarity with automation and infrastructure provisioning methodologies.
