### Job Description

Our client is a well-established Japanese engineering MNC specializing in power generation solutions across ASEAN region. Due to their business expansion, they are now looking for an experienced **Steam Turbine Solution Engineer** to support regional retrofit, upgrade and modernization projects.

This role is ideal for engineers with strong hands-on knowledge of **steam turbine systems**, proposal engineering and technical solution development

**Key Responsibilities: -**

- Develop technical and commercial solutions for **steam turbine retrofit, upgrade, overhaul, rewinding and replacement projects**
- Work closely with customers to understand their steam turbine operation, performance challenges and plant requirements
- Prepare technical proposals, costing, quotations and tender submissions

- Provide engineering solutions to improve turbine efficiency, reliability and plant lifecycle
- Coordinate with regional engineering teams, sales and global technical experts throughout project execution
- Deliver technical presentations and support customer discussions across the ASEAN region

**Requirements:**

- Bachelor Degree in Mechanical Engineering or related discipline
- **10 - 15 years of experience in Steam Turbine engineering within thermal power plants**
- **Strong technical knowledge of:**
  - **Steam Turbines**
  - **Turbine Rotor**
  - **Turbine Blades**
  - **Turbine Casing**
  - **Turbine Auxiliaries**
  - **Turbine Performance**
- Hands on experience in **retrofit, upgrade, overhaul, life extension, modernization or aftermarket projects**
- Experience preparing technical proposals or providing engineering solutions for turbine projects
- Able to communicate confidently with customers and internal engineering teams
- Willing to travel within ASEAN
