Job Description

Our client is a global manufacturing organization specializing in high-precision engineered components for medical, industrial, and consumer applications. Join them now as an Automation Engineer to be a part of an ever-growing team. The successful candidate will be responsible for machine automation, PLC programming, robotics integration, vision inspection systems, process improvement, equipment troubleshooting, and implementation of Industry 4.0 initiatives.

Job Descriptions

- Design, develop, and implement manufacturing automation solutions.
- Lead automation projects from concept, design, procurement, installation, commissioning, and production handover.
- Develop, modify, and troubleshoot PLC programs and HMI interfaces.
- Program and optimize industrial robots and gantry systems.

- Maintain machine vision inspection systems.
- Support automation for pick-and-place, assembly, inspection, packaging, and dispensing applications.
- Integrate molding machines, dispensing systems, converting machines, conveyors, vision systems, barcode readers, leak testers, and peripheral equipment.
- Improve OEE, cycle time, yield, and productivity through automation and continuous improvement projects.
- Support Lean Manufacturing and Kaizen activities.

Job Requirements

- Bachelor's Degree in Mechatronics Engineering, Electrical Engineering, Electronics Engineering, Automation Engineering, or related discipline.
- Min 3 years of experience in industrial automation, machine controls, or manufacturing engineering.
- Experience in plastic injection molding, silicone dispensing, die-cut converting, assembly automation, or related manufacturing environment is preferred.
- Pneumatic and electrical control systems.
- AutoCAD Electrical or equivalent electrical design software.
- Knowledge in ISO 9001, ISO 14001, ISO 13485 and IATF 16949.
