Job Description

Company Overview

JAC's client, a company in the financial technology industry is hiring for a Bridge Software Engineer position. This opportunity is ideal for professionals who enjoy bridging communication between international stakeholders and software development teams.

Job Description

- Collaborate with Japanese stakeholders to gather, clarify, and communicate project requirements, specifications, and development processes.
- Act as the bridge between customers and development teams to support smooth communication throughout the project lifecycle.
- Analyze business and technical requests and transfer requirements accurately to development team members.
- Work closely with Project Managers or Project Leaders to monitor project progress and delivery.

- Support project coordination activities and contribute to successful implementation.
- Take on broader responsibilities over time, including project management and stakeholder coordination.

Qualifications

- More than 2 years of experience as a Bridge System Engineer or in a related role.
- Japanese proficiency at JLPT N2 level or above with strong communication skills.
- Good understanding of software development processes.
- Hands-on programming experience and technical knowledge.
- Experience working with low-level design documentation.
- Strong sense of ownership, responsibility, and self-motivation.
- Project management experience is an advantage.
- Experience living or working in Japan is preferred.

Benefits

- Commuting allowance.
- Meal allowance.
- Mandatory insurance coverage in accordance with regulations.
- Tet bonus.
- Annual salary review.
- Annual health checkup.
- Annual leave.
