Job Description

Position: Metallurgical Engineer**Responsibilities:**

- Control and monitor the entire tin smelting process, from raw material preparation, smelting operations, metallurgical quality improvement, through to casting and forming.
- Inspect and ensure product quality meets established standards; control furnace temperatures and other process parameters to maintain optimal operating conditions.
- Analyze and troubleshoot issues that occur during the production process; prepare reports on production performance and metal quality.
- Ensure workplace safety when handling molten metals and related equipment.

Qualifications:

- At least 1 year of relevant work experience.
 - Bachelor's degree in Metallurgical Engineering or a related field.
 - Understanding of tin smelting processes or other low-melting-point molten metals.
 - Knowledge of metal chemical composition and metallurgy principles.
 - Ability to analyze and understand the effects of various elements present in metals, including alloying elements and trace elements.
 - Experience using metal analysis equipment, such as Optical Emission Spectrometry (OES) or other metal testing instruments.
 - Ability to conduct and interpret results of metallurgical testing.
- Candidates with direct experience in tin smelting or non-ferrous metals will receive special consideration.
