Job Description

Company overview-

It is a Japanese trading & engineering solutions company focused on industrial machinery, automation, and factory solutions across sectors like automotive, pharma, electronics (SMT), and manufacturing.

Job Overview-

It is a Junior Engineer role majorly into service, maintenance, and commissioning of industrial and automotive components and machines.

Job Responsibilities-

- Support machine installation, testing, commissioning, and service activities at customer sites.
- Assist in project execution, site coordination, and daily progress reporting.
- Support basic troubleshooting related to PLC, electrical systems, sensors, and pneumatics.
- Prepare service reports, checklists, and handover documents.
- Follow site safety norms, PPE requirements, and company procedures.
- Coordinate with customers, vendors, and internal teams for smooth execution.
- Travel to project sites as required.

Job Requirements-

- Diploma or Engineering in Mechanical, Electrical, or Mechatronics.
- 0 to 2 years of experience.
- Basic knowledge of PLC and pneumatics.
- Good English communication and reporting skills.
- Willingness to travel and work at customer sites.
