Job Description

Company overview-

It is a Japanese trading & engineering solutions company focused on industrial machinery, automation, and factory solutions across sectors like automotive, pharma, electronics (SMT), and manufacturing.

Job Overview-

It is a Senior Engineer or AM level role majorly into service, maintenance, and commissioning of industrial and automotive components and machines.

Job Responsibilities-

- Handle end-to-end execution of machine installation and turnkey projects from planning to commissioning and handover.
- Prepare project plans, schedules, resource requirements, and execution strategy to meet timeline, cost, and quality targets.
- Coordinate customer, vendors, subcontractors, internal teams, and site teams for smooth project execution.jobs.
- Manage MEP-related coordination and interface activities during project execution.
- Monitor project progress, identify risks or delays, and take corrective actions to ensure timely completion.
- Ensure compliance with industrial safety norms, permit systems, and quality standards at site.
- Lead installation, testing, commissioning, final buy-off, and successful customer handover.
- Submit regular progress updates, MIS reports, service reports, and project closure documents to both company management and customer.
- Support commercial and vendor-related activities such as scope review, subcontract coordination, and change tracking where required.jobs.

Job Requirements-

- Diploma or Engineering in Mechanical, Electrical, or Mechatronics.
- 6 to 9 years of experience.
- knowledge of PLC and pneumatics.
- Good English communication and reporting skills.
- Willingness to travel and work at customer sites.
