Job Description

Join a global data team responsible for managing critical investment and fund-related data used across multiple business functions and regions. This role combines data operations, ETL monitoring, data quality management, and hands-on SQL support within a collaborative financial services environment.

Client Details

Our client is a well-established investment management organization with a global focus on fund, portfolio, and financial data management. The company operates sophisticated data platforms supporting investment operations, analytics, and reporting across international teams.

Description

- Manage incoming data feeds and monitor daily ETL batch processing activities.
- Investigate and resolve operational and data-related issues in a timely manner.
- Monitor data events and ensure accurate processing and delivery.
- Maintain high standards of data quality, integrity, and consistency.
- Perform data operations through enterprise Data Warehouse platforms, including:
 - Process monitoring

- Exception handling
- Master data management
- User access administration
- Support ongoing data management and system enhancement projects.
- Create and maintain operational and technical documentation.
- Review, maintain, and implement changes to SQL and Python scripts.
- Collaborate with internal stakeholders to ensure smooth delivery of investment-related data.

Job Offer

- Primarily remote work with occasional office attendance when required.
- Opportunity to support globally utilized investment data platforms.
- Exposure to SQL, ETL, Python, master data management, and enterprise data governance practices.
- Collaborative international working environment.

To apply online please click the 'Apply' button below. For a confidential discussion about this role please contact Serena Wu on +81 3 6627 6137.

Required Skills

- 5+ years of experience working with Microsoft Windows-based environments.
 - 3+ years of experience in data operations, database maintenance, or related data management functions.
 - Strong working knowledge of SQL and relational databases.
 - Experience supporting ETL processes and data quality controls.
 - Advanced Microsoft Excel skills.
 - Python knowledge is advantageous.
 - Experience with EDM and/or MDM solutions is beneficial.
 - Financial services experience is preferred, particularly exposure to:
 - Fund data
 - Account data
 - Portfolio data
 - Investment operations data
 - Interest in or familiarity with generative AI technologies is an advantage.
 - Business-level Japanese (N1/N2 equivalent).
 - Business-level or lower business-level English communication skills.
 - Ability to work independently while collaborating effectively with stakeholders.
 - Strong sense of ownership, responsibility, and continuous learning.
