■ Job Description ・Maintenance and upkeep of production equipment and manufacturing lines within the factory ・Introduction of new equipment to manufacturing lines, negotiation with equipment manufacturers, and equipment commissioning ・Maintenance and management of electrical systems for equipment, and more

This role covers a wide range of technical responsibilities, including production engineering and equipment maintenance for factory facilities. You will have the opportunity to build extensive knowledge and expertise, growing into a highly marketable professional.

■ About the Factory Each detailed process has its own dedicated machinery. The facility includes 18 large kilns, approximately 10 packaging lines, wastewater treatment systems, LNG equipment, and much more.

■ Handling Breakdowns While machine breakdowns can occur, they are not frequent. A rotating on-call system is in place to handle any issues that arise.

■ Job Satisfaction The reward of managing production equipment lies in contributing to the creation of products that deliver safety and peace of mind to our customers. Keeping factory production equipment running smoothly and trouble-free directly connects to both **customer confidence** and **a better working environment for our employees**. We provide an environment where you can fully leverage your experience and expertise.
