Job Description

COMPANY OVERVIEW

The client is a leading Asia-based consulting and technology services firm that helps organizations drive digital transformation, business process improvement, and enterprise system implementation across industries.

JOB RESPONSIBILITIES

Generative AI & Agentic AI

- Design and deploy AI solutions using LLMs, Generative AI, and Agentic AI technologies.
- Build end-to-end applications, APIs, and enterprise integrations.
- Develop AI agents using Microsoft Copilot Studio and related frameworks.
- Architect secure, scalable, cloud-native AI solutions.

Consulting & Pre-Sales

- Gather business requirements and translate them into AI solutions.
- Define use cases, solution architectures, and implementation roadmaps.
- Conduct workshops, build PoCs, demos, and support client presentations.
- Provide technical advisory throughout the project lifecycle.

JOB REQUIREMENTS

- Bachelor's degree in Computer Science, Engineering, Data Science, or related field.
- Minimum 3 years' experience in Software Engineering, AI/ML, or related roles.
- Strong proficiency in Python and JavaScript/TypeScript.
- Experience with React, FastAPI, Flask, or similar frameworks.
- Good understanding of LLMs, RAG, prompt engineering, embeddings, vector databases, and AI agents.
- Hands-on experience with LangChain, Semantic Kernel, or similar AI frameworks.
- Experience with Azure, AWS, or GCP, preferably including Azure OpenAI and AI Search services.
- Familiarity with CI/CD, Docker, containerization, and DevOps practices.
- Strong problem-solving, communication, and stakeholder management skills.
- Prior experience in Financial Services, Trading, Logistics, or Supply Chain is a plus.
