Job Description

About the role

The Quality Assurance role offers an opportunity to contribute to quality-focused operations within a manufacturing environment. This position is ideal for an experienced professional who can support quality standards, collaborate with stakeholders, and contribute to continuous operational excellence.

Responsibilities

- Support quality assurance activities to help maintain established quality standards.
- Collaborate with internal teams to address quality-related matters and support business objectives.
- Work closely with stakeholders to ensure effective communication and coordination.
- Contribute to the continuous improvement of quality processes and operational performance.
- Support cross-functional activities within a manufacturing environment.
- Communicate effectively with colleagues and stakeholders in English and, where applicable, Japanese.

Requirements

- Previous experience in a Quality Assurance position.
- Experience working within a manufacturing environment.
- Experience with a Japanese company is preferred.
- Ability to communicate effectively in English.
- Japanese language skills would be advantageous.
- Strong communication and interpersonal skills.
- Ability to work effectively with internal and external stakeholders.
- Professional experience in a manufacturing-related business environment.

About the company

A company in the manufacturing industry, this organisation operates within an international business environment and places a strong emphasis on quality, collaboration, and operational excellence. The company values technical expertise, professional communication, and effective teamwork to support its business objectives.
