Job Description

Join a large-scale technology and telecommunications business developing innovative digital products for international markets. This is a hands-on technical leadership role combining software architecture, team leadership, and delivery of cloud-native platforms using modern Java technologies.

Client Details

Our client is a leading technology and telecommunications organization with a strong presence across digital services and connectivity solutions. The company develops large-scale consumer and enterprise platforms, investing heavily in cloud technologies, product innovation, and next-generation digital experiences.

Description

- Lead the design, development, and delivery of scalable microservices and cloud-native applications.
- Act as a technical lead for a small engineering team, providing mentorship, guidance, and technical direction.
- Design and build secure, resilient, and high-performance systems using modern engineering best practices.
- Collaborate with Product Managers, Designers, and Engineers in an Agile development environment.
- Drive code quality, observability, system reliability, and continuous improvement initiatives.
- Contribute to architectural decisions and long-term technology strategy.

- Support the development of AI-enabled products and innovative digital solutions.
- Participate in cross-platform and multi-platform application development projects.
- Ensure successful delivery of complex B2B2C and multi-tenant platform solutions.

Job Offer

- Opportunity to lead engineering initiatives on large-scale international products.
- High-impact role combining technical leadership and hands-on development.
- Modern cloud-native technology stack and engineering-focused culture.
- Exposure to AI-enabled product development and innovation initiatives.
- English-speaking working environment.
- Collaboration with global stakeholders across product, engineering, and business teams.
- Clear opportunity to influence architecture, engineering standards, and product direction.

To apply online please click the 'Apply' button below. For a confidential discussion about this role please contact Serena Wu on +81 3 6627 6137.

Required Skills

- 7+ years of professional software engineering experience.
- 3+ years of experience as a Technical Lead, Team Lead, or similar leadership role.
- Strong experience leading small engineering teams while remaining hands-on in development.
- Proven track record delivering scalable B2B2C or multi-tenant platforms.
- Deep expertise in microservices architecture and distributed systems.
- Strong experience with:
 - Java 21/25
 - Spring Boot
 - REST APIs
 - TypeScript
 - PostgreSQL
 - AWS (RDS, Cognito, ECS, SQS, SNS, ElastiCache)
 - OAuth2, JWT, and modern security frameworks
 - Resilience and fault-tolerant system design
 - Observability tools such as Grafana and Sentry
- Business-level communication skills in English. Japanese language skills are not required.

Preferred Skills

- Angular
- Flyway
- Redis
- Tailwind CSS
- Cross-platform mobile application development
- Knowledge of AI Agent development
