Job Description

JOB RESPONSIBILITIES

- Maintain and enhance software for existing products and manufacturing systems.
- Troubleshoot production software issues, investigate failures, and drive corrective actions.
- Manage outsourced software development projects from design, development, validation, deployment, to maintenance.
- Design and develop automated manufacturing test solutions, including hardware integration and software programming.
- Perform system integration, debugging, optimization, and repeatability studies.
- Collaborate with stakeholders to improve testing strategies and deliver innovative solutions.

JOB REQUIREMENTS

- Bachelor's Degree in Software Engineering, Computer Science, Information Technology, or related field.
- Minimum 5 years of experience in test engineering, test development, or manufacturing environments.
- Proficient in NI LabVIEW, NI TestStand, C#, C++,and Python.
- Strong knowledge of industrial automation and automated test systems.
- Proven project management experience, including managing outsourced software vendors.
- Hands-on experience with test and measurement instrumentation and remote equipment control software.
- Strong SQL skills, including advanced queries, stored procedures, views, and functions.
- Working knowledge of database administration (backup/recovery, replication, clustering, log shipping).
- Basic understanding of HTML and CSS.
