No permission to work in Japan required

Job Description

Our client, Heavy Industry Manufacturing Based Company, looking for suitable candidates

JOB RESPONSIBILITIES

- Create, review, and modify detailed technical drawings, schematics, and general arrangement drawings for pressure vessels, shell and tube heat exchangers, storage tanks, hoppers/silos, screw conveyors, pneumatic conveying systems, and other bulk handling equipment.
- Ensure drawings comply with ASME codes (Section VIII for pressure vessels and related standards for other equipment types), customer specifications, and company drafting standards.
- Produce and check nozzle orientation drawings, tube layout drawings, GD&T callouts, and welding symbols to fabrication-ready standard.

JOB REQUIREMENTS

- Bachelor's degree in Mechanical Engineering, Drafting Technology, or a related field. Candidates with a Diploma and a strong demonstrated portfolio of iLogic/automation work may also be considered.
- Minimum 5 years of drafting/CAD experience in mechanical or industrial design, ideally within pressure vessel, heat exchanger, storage tank, or bulk handling equipment fabrication. (This is a Senior role — fresh graduates are not suitable.)
- At least 2–3 years of hands-on experience specifically writing and deploying Autodesk Inventor iLogic rules — not just general CAD experience.
