Job Description

Company Overview

A leading provider of advanced automation and equipment solutions for the semiconductor manufacturing industry is seeking a Field Service Engineer to join its growing team. The company specializes in high-precision automation systems that support some of the world's leading semiconductor manufacturers, delivering innovative technologies, exceptional reliability, and comprehensive technical support. This is an excellent opportunity for hands-on engineers who enjoy working with sophisticated automation equipment, solving technical challenges, and providing direct support to customers in a dynamic and growing industry.

Key Responsibilities

- Install, commission, calibrate, and test automation equipment at customer sites.
- Diagnose, troubleshoot, and repair equipment malfunctions to minimize downtime and ensure smooth production operations.

- Perform spare parts replacement, machine servicing, and preventive maintenance activities.
- Provide routine technical support and on-site production assistance to customers.
- Monitor equipment performance and prepare timely service reports and technical feedback.
- Ensure all service activities are conducted in compliance with safety and regulatory requirements.
- Build and maintain strong relationships with customers through responsive and professional support.
- Collaborate with internal engineering and service teams to resolve technical issues efficiently.

Requirements

- Diploma or Degree in Engineering, Factory Automation, Mechatronics, Electrical Engineering, Mechanical Engineering, or a related field.
- Experience in machine installation, maintenance, troubleshooting, or technical support.
- Exposure to automation equipment or industrial machinery is preferred.
- Experience in the semiconductor industry is an added advantage.
- Ability to read and interpret mechanical, pneumatic, and electrical drawings.
- Hands-on troubleshooting and maintenance skills.
- Familiarity with automation systems and equipment.
- Basic proficiency in Microsoft Office applications (Excel, Word).
- Strong problem-solving and analytical skills.
- Good communication and interpersonal abilities.
- Customer-focused with a proactive attitude.
- Willing to travel and support customers on-site when required.
- Fresh graduates with strong technical aptitude are encouraged to apply, as training will be provided.
