Job Description

JOB RESPONSIBILITIES

- Ensure products comply with customer specifications, engineering drawings, and quality standards
- Monitor incoming, in-process, and final product quality
- Investigate customer complaints and quality issues; drive corrective and preventive actions
- Perform root cause analysis using 8D, 5 Why, and fishbone diagram
- Prepare and maintain quality documents such as control plans, inspection standards, PFMEA, and records
- Support new product development including PPAP and customer submissions
- Work with production, engineering, and suppliers to resolve quality issues and improve processes

JOB REQUIREMENTS

- Bachelor’s Degree / Diploma in Engineering, Manufacturing, Quality, or related field.
- Preferably with at least 3 years of QA/QC experience in a manufacturing environment, experience in precision engineering or components manufacturing would be a plus.
- Strong analytical, problem-solving skills and knowledge quality tools (i.e. 8D, 5 Why, PFMEA etc.).

Interested candidates are welcomed to apply online.
