Job Description

A Network Engineer role in the insurance industry, based in Tokyo, involves managing and maintaining network systems to ensure seamless operations. The position requires technical expertise in network infrastructure and the ability to support the organisation's technological needs.

Client Details

A Global organisation in the insurance industry located in Tokyo.

Description

- Manage and maintain network infrastructure to ensure optimal performance and reliability.
- Monitor network systems and address any issues or disruptions promptly.
- Implement network upgrades and configurations as required.
- Collaborate with internal teams to support technology initiatives and projects.
- Ensure network security by applying best practices and protocols.
- Document network processes and procedures for efficient troubleshooting and maintenance.
- Provide technical support and guidance to team members and stakeholders.
- Analyse network performance and suggest improvements to enhance efficiency.

Job Offer

- Competitive salary
- Long term growth

If you have the skills and experience to excel in this Network Engineer role, we encourage you to apply.
