Job Description

Japan Data Center Engineer

Position

Data Center Engineer / Data Center Operations Engineer

Location

- **Tokyo**
- **Osaka**

Working Hours

- **Tokyo:** Monday–Friday, 10:00–19:00
- **Osaka:** Monday–Friday, 09:00–18:00
- Approximately **3–5 times per month**, after-hours or weekend work may be required.

Job Overview

Responsible for day-to-day data center operations, hardware support, asset and inventory management, cabling, vendor coordination, change management, and project support across Japan data center sites.

Key Responsibilities

- Perform physical hardware operations including **restart, power cycling, shutdown, break/fix, replacement and upgrades**
- Install, rack, move and configure servers and other data center equipment
- Perform **cable patching, cable replacement, labeling and cable management**
- Conduct daily data center inspections and identify/escalate abnormalities
- Manage hardware, rack, cable, IPDU, network/storage and asset inventories
- Manage equipment delivery, receiving, removal and disposal activities
- Support **hardware retirement, EOL and disposal processes**
- Manage data center access, escort customers/vendors and coordinate site visits
- Review and manage **ServiceNow Change, Task, Request and Incident tickets**
- Prepare daily, weekly and monthly operational reports
- Coordinate with **colocation providers, vendors and internal IT teams**
- Support data center projects including migration, upgrade, refresh and new equipment deployment
- Support structured cabling and rack deployment projects
- Coordinate vendor activities and ensure work is completed according to approved procedures
- Support internal and external audits, including **PCI DSS and JISC**
- Coordinate data center facility maintenance and preventive maintenance activities
- For **JP2**, support quarterly tape backup management, inventory, reporting and tape destruction
- Act as a key contact/escalation point for Japan data center operations and related vendors

Required Skills

Required Skills & Experience

- Experience in **Data Center Operations / Infrastructure Support**
- Hands-on experience with **servers, network equipment, racks, cabling and hardware**
- Experience with hardware installation, replacement, troubleshooting and asset management
- Experience working in a **data center or similar IT infrastructure environment**
- Basic knowledge of ITIL / Change Management processes
- Experience with **ServiceNow or similar ticket management systems**
- Good communication and coordination skills with internal teams and vendors
- Ability to work after hours/weekends when required
- Business-level **Japanese communication skills**

Preferred Skills

- Experience with **colocation data centers** such as Equinix
- Experience with **Nlyte** or other data center asset management tools
- Knowledge of structured cabling and rack design
- Experience supporting **data center migration / refresh / EOL projects**
- Experience with tape backup operations
- Experience supporting **PCI DSS / JISC or other IT audits**
- Vendor management experience

Position Type

On-site Data Center Operations / Infrastructure Support

Company Description
