Job Description

Our client is a leading industrial manufacturing company that specializes in Precision Die Casting, CNC Machining, and Sheet Metal Fabrication. As a prominent player in this industry, our client prides itself on its robust Quality Control framework, from design and production to logistics and more, ensuring consistent and high-quality production of die casting and sheet metal parts while keeping defects to an absolute minimum. Join them to be part of a fast-growing team of talents!

Job Descriptions

- Responsible for the respective KPI, QCDS (Quality, Cost, Delivery and Safety)
- Oversee daily operations of Engineering & Production to meet the KPI (OTD, OEE, Process Yield, Machine Down Time / Manpower Utilization), ensure maximum efficiency and productivity
- Develop continuous improvement (Kaizen) projects focusing on cost reduction, yield improvement, CPK improvement, process optimization, cycle time improvement and new parts evaluation / qualification.

- Lead new product development to ensure SOP, training, jigs, and tools are available for producing new products.
- Ensure production adheres to health, safety and environmental policies and procedures to ensure the safety and wellbeing of workers
- Monitor workers' work performance, discipline and attendance and take necessary disciplinary action with HR advice.
- Monitor inventory levels and adjusting production accordingly to avoid overproduction.
- Implements, coordinates and monitors production schedules and workflow activities from time of release to delivery of completed finished product.

Job Requirements

- Bachelor Degree / Post Graduate Diploma / Professional Degree in Engineering (Industrial / Mechanical / Metal Fabrication) or equivalent.
- Min 10 years of related working experiences and 5 years of experience at managerial level in manufacturing industry, with exposure in die casting and injection molding.
- Knowledgeable with experience of ISO standards requirement.
- Good organizational and analytical skill to ensure work processes carried out by subordinates are efficient and effective.
- Experience in production planning.
