Job Description

Position Name: PE Programmer

Key Responsibilities

- Develop and maintain internal software applications to support Production and Engineering functions, enhancing productivity and quality within manufacturing processes.
- Analyze user requirements and design software solutions to improve operational efficiency and business processes.
- Perform software testing, troubleshooting, debugging, and system enhancements to ensure functionality and user satisfaction.
- Design and support database systems, system integration, and related IT projects based on business requirements.
- Coordinate with internal users and external vendors for software development and system implementation activities.
- Prepare and maintain technical documentation, user manuals, and project-related reports.

- Provide technical support and training to users when required.
- Perform other duties as assigned.

Qualifications

- Male or Female, aged 25 –35 years.
- Bachelor's degree in Computer Engineering, Computer Science, Information Technology, or a related field.
- Minimum 2–4 years of experience in Software Development or Programming.
- Knowledge of programming languages and technologies such as C#, VB.NET, JavaScript, PHP, Web Applications, UI/UX, PostgreSQL, or related tools.
- Experience in database design and system integration is an advantage.
- Strong analytical, problem solving, and teamwork skills.
- Eager to learn new technologies and continuously improve work processes.
