Job Description

Site Reliability Engineer (SRE) – Financial Technology

About the Role

We are looking for an experienced **SRE / Infrastructure Engineer** to support mission-critical financial systems and improve reliability, automation, scalability, and observability.

Requirements

- 5+ years of experience operating Linux environments
- Strong experience with production systems, availability, and performance
- Strong knowledge of Linux kernels, processes, and networking
- Experience with **Ansible, Puppet, and Terraform**
- Experience with **GitLab, Nexus, and Docker**
- Experience with **Prometheus, Grafana, monitoring, logging, and APM**
- Experience with **KVM and OpenStack**
- Experience with **FreeIPA and Active Directory**

- Programming/scripting experience with **Bash, Python, or Go**
- Experience with **Consul, Vault, or Terraform**
- **English:** Business level
- **Japanese:** Conversational level (JLPT N3)

Nice to Have

- Kubernetes experience
- Immutable infrastructure
- AI/LLM experience for automation and reliability
- Financial industry experience
- Experience working with overseas vendors

What You'll Do

- Monitor and improve production environments
- Build monitoring and observability platforms
- Develop infrastructure automation and IaC
- Improve CI/CD using GitLab, Nexus, and Docker
- Troubleshoot Linux and networking issues
- Develop automation tools using Bash, Python, or Go
- Manage KVM/OpenStack environments
- Manage FreeIPA and Active Directory
- Work with HashiCorp tools such as Consul, Vault, and Terraform

Why Join?

- Work on **mission-critical financial infrastructure**
- Strong focus on **SRE, DevOps, IaC, and automation**
- High level of technical ownership
- International engineering environment
- Opportunity to contribute to long-term infrastructure strategy

Company Description
