Job Description

We are seeking an experienced **Senior Cloud Engineer** to support a global Cyber Defense organization with advanced cloud security operations and hybrid infrastructure management. This role involves designing secure cloud environments, optimizing log collection systems, and collaborating with international teams to ensure reliable security operations across multiple business units.

You will work with cutting-edge technologies across **AWS, Azure, GCP**, and on-prem environments, while contributing to Infrastructure as Code (IaC), CI/CD automation, and cloud security best practices.

Required Skills

- Strong ability to build and operate secure, scalable cloud environments across multi-cloud platforms (**AWS, Azure, GCP**)
- Hands-on experience automating infrastructure and improving reliability through modern DevOps practices
- Solid understanding of cloud-native security concepts and proactive risk identification

- Practical scripting skills for streamlining operations and solving technical challenges
- Design, build, and maintain **CI/CD pipelines** to support Infrastructure as Code (IaC) deployments.
- Ability to work effectively with global teams and communicate technical ideas clearly
- Familiarity with hybrid architectures and integrating cloud with on-prem systems

Company Description
