Job Description

Job Description

- * Plan, coordinate, and supervise utilities construction projects supporting industrial estate development from initiation through completion.
- * Oversee the construction and installation of water supply, wastewater, electrical, utility networks, and other supporting infrastructure.
- * Manage project schedules, budgets, resources, contractors, and construction activities to ensure timely and cost-effective delivery.
- * Review and interpret engineering drawings, specifications, BOQs, contracts, and technical documents related to utility systems.
- * Coordinate with engineering, MEP, QA/QC, consultants, contractors, utility providers, and other stakeholders to ensure proper execution and integration of utility systems.
- * Monitor construction progress, installation quality, testing, commissioning, and handover of utility systems.
- * Identify and resolve technical, coordination, and site-related issues that may affect project quality, cost, or schedule.
- * Ensure compliance with applicable technical standards, safety regulations, environmental requirements, utility requirements, and company standards.
- * Implement quality control and risk management procedures and prepare regular progress reports for management.

Requirements

- * Bachelor's degree in Civil Engineering, Electrical Engineering, Mechanical Engineering, or a related field.
- * Minimum 8 years of experience in utilities, MEP, or construction project management, with at least 4 years in a managerial role.
- * Proven experience in industrial estate, utilities, MEP, or large-scale development projects (min 500 Ha) civil projects.
- * Strong understanding of utility systems, construction methods, project scheduling, and contractor management.
- * Strong leadership, problem-solving, decision-making, and stakeholder management skills.
- * Excellent communication and coordination skills.
- * High integrity and strong commitment to safety and quality.
- * Proven ability to work under pressure, prioritize tasks, and manage multiple projects simultaneously.
- * PMP or relevant professional certifications are preferred.
