Job Description

Company and Job Overview

- Our client is a leading manufacturer of public transportation vehicles, specializing in electric powered buses.
- The Malaysia operation supports regional manufacturing and engineering activities across the Asia-Pacific market.
- Currently they are seeking a Frontend Software Developer to design and develop intuitive, user-friendly web applications that support engineering, manufacturing, and operational activities.
- The candidate will play a key role in translating business and operational requirements into modern digital solutions.

Job Responsibilities

- Design, develop, and maintain responsive web-based applications and dashboards.

- Create modern and intuitive user interfaces (UI) and user experiences (UX) for internal and customer-facing systems.
- Collaborate closely with Design Engineers, Production Teams, and stakeholders to understand business requirements.
- Translate functional requirements into scalable frontend solutions.
- Work with backend developers and other technical teams to integrate APIs and system functionalities.
- Ensure applications are optimized for performance, usability, accessibility, and security.
- Conduct testing, debugging, and troubleshooting activities to maintain application quality.
- Participate in code reviews and contribute to software development best practices.
- Support continuous improvement initiatives and digitalization projects across the organization.
- Communicate effectively with the UK Engineering Manager and global project teams.

Job Requirements

- Bachelor's Degree in Computer Science, Software Engineering, Information Technology, or related field.
- Minimum 2-5 years of experience in Frontend Development or Software Development.
- Experience designing and developing web-based applications.
- Experience working with UI/UX principles and responsive design.
- Strong proficiency in: HTML5, CSS3, JavaScript / TypeScript
- Experience with frontend frameworks such as: React.js, Angular, Vue.js
- Familiarity with Agile methodologies
- Understanding of UI/UX design tools such as Figma.
