Job Description

Job Description:

In this backend engineer role, you will primarily be responsible for the API development and operation of our client's Travel services. The role involves using Java and Spring to handle a wide range of responsibilities, spanning everything from architectural planning and system design to responding to user inquiries. You will collaborate with related teams within the client's Group such as those managing payments, loyalty points, and member accounts to handle high-volume traffic.

This position offers ample opportunities to hone your technical skills while achieving results through team collaboration. You are also expected to serve as a role model for the next generation of engineers and drive the organization's growth.

Work Environment:

Development: Java, Spring Framework, Spring Boot, Spring Data, Spring Cloud Config, JUnit, Apache Maven, IntelliJ IDEA

Middleware: Oracle Database, Oracle GoldenGate for Big Data, MongoDB, Redis, Elasticsearch, Kafka, RabbitMQ, Kong, Nginx, Tomcat

Infrastructure: Private cloud (IaaS/Virtual Machines)

Monitoring: Jennifer (APM), New Relic (APM), ELK stack (Elasticsearch, Logstash, Kibana), Prometheus, Grafana, Oracle Enterprise Manager, MongoDB Ops Manager, PagerDuty

CI/CD: Jenkins, SonarQube, Ansible

Other: Microsoft Teams, Confluence, JIRA, Bitbucket, etc.

Required Skills

Required Qualifications:

Technical Skills:

・6+ years of experience in the design, development, and operation of large-scale Web APIs on Linux servers using Java and Spring Framework

・Experience in table design and query creation for the efficient use of RDBMS (e.g., Oracle Database) and NoSQL (e.g., MongoDB, Redis)

・Experience in distributed development using version control systems (e.g., GitHub, Bitbucket) and pull requests

Soft Skills:

・Ability to take the initiative in problem-solving and process improvement, and to involve others in these efforts

・An inquisitive mindset regarding problems

・Ability to keep pace with rapidly changing business strategies and a commitment to continuous self-improvement

・Ability to communicate proactively in English

・A drive to take on new challenges and make improvements rather than being satisfied with the status quo

・Ability to prioritize teamwork and deliver results

Preferred Qualifications:

Technical Skills:

・Experience in the development and operation of messaging services such as Kafka or MQ

・Experience operating high-traffic services, including performance tuning and access control
