Job Description

Key Responsibilities

- Conduct research and development activities related to animal feed, feed additives, nutrition, and feed formulation.
- Design, plan, and execute laboratory, pilot-scale, and field trials to evaluate feed performance, nutritional value, and product effectiveness.
- Analyze experimental data, interpret results, and provide recommendations for product improvements and new developments.
- Collaborate with cross-functional teams including Production, Quality Assurance, Technical Service, Sales, and Regulatory Affairs to support business objectives.
- Monitor industry trends, emerging technologies, ingredient innovations, and market developments within the feed and livestock sectors.
- Support the development and optimization of feed formulations to improve animal performance, health, and production

efficiency.

- Prepare technical reports, research summaries, presentations, and scientific documentation.
- Coordinate with external partners, universities, research institutes, and suppliers on collaborative research projects when required.
- Ensure all research activities comply with relevant quality standards, regulatory requirements, and company procedures.
- Provide technical support and training to internal teams and customers as needed.

Qualifications

- Bachelor's or Master's Degree in Animal Science, Animal Nutrition, Feed Technology, Veterinary Science, Agriculture, Biotechnology, or a related field.
- Experience in feed research, animal nutrition, feed formulation, feed additives, livestock production, or related technical areas.
- Strong knowledge of feed ingredients, nutritional requirements, and feed manufacturing processes.
- Experience in designing and conducting research trials, data analysis, and statistical evaluation.
- Familiarity with laboratory testing methods and feed quality assessment.
- Good analytical, problem-solving, and project management skills.
- Ability to interpret technical information and communicate findings effectively.
- Experience working with poultry, swine, aquaculture, ruminant, or pet food applications is an advantage.
- Proficient in Microsoft Office and data analysis tools.

Good command of English, both written and spoken.
