Job Description

Job Summary
We are seeking a skilled and experienced Maintenance Technician/Engineer to manage preventive and predictive maintenance activities, ensure smooth operation of plant utilities, and maintain electrical and mechanical systems. The ideal candidate should possess hands-on experience in the automotive or engineering industry and have strong troubleshooting and maintenance skills.

Key Responsibilities

- Perform preventive and predictive maintenance of electrical and mechanical equipment.
- Ensure smooth functioning and maintenance of all plant utilities.
- Diagnose and rectify electrical and mechanical breakdowns to minimize downtime.
- Monitor and maintain utility systems such as compressors, DG sets, transformers, HVAC systems, pumps, and related equipment.
- Conduct routine inspections and maintenance activities as per maintenance schedules.

- Ensure compliance with safety standards and company maintenance procedures.
- Maintain maintenance records, equipment history, and service reports.
- Coordinate with production and other departments to ensure uninterrupted operations.
- Support continuous improvement initiatives for equipment reliability and efficiency.

Required Qualifications & SkillsEducational Qualification

- Diploma in Electrical & Electronics Engineering (D.E.E.E.)

Experience

- 4 to 5 years of relevant maintenance experience in the Automotive or Engineering industry.

Mandatory Requirements

- Valid **C License Holder**.
- Strong knowledge of **Preventive & Predictive Maintenance**.
- Hands-on experience in both **Electrical and Mechanical Maintenance**.
- Experience in handling and maintaining all plant utilities.

Additional Requirements

- Knowledge of **EMS (Energy Management System)**.
- Good troubleshooting and analytical skills.
- Ability to work independently and under pressure.
- Basic knowledge of safety standards and maintenance documentation.
