Job Description

Company Overview

Our client is a highly esteemed and well-established engineering contractor, recognized globally for its comprehensive Mechanical & Electrical infrastructure expertise. With a significant and successful presence in Singapore, they are a leader in delivering complex, large-scale projects, including cutting-edge data centers, commercial high-rises, and industrial facilities. Their commitment to superior quality, precision engineering, and rigorous safety standards sets them apart. As they continue to expand their impressive portfolio of critical infrastructure projects, they are seeking an experienced and dynamic Mechanical (HVAC) Manager / Mechanical (HVAC) Engineer to lead key initiatives and drive successful project outcomes.

Key Responsibilities

- Manage and execute Mechanical (HVAC/ACMV) engineering projects from initial planning and design review through to installation, testing, commissioning, and final handover.
- Review and prepare mechanical design calculations, technical specifications, and working drawings to ensure full compliance with project requirements and statutory codes.

- Coordinate seamlessly with clients, consultants, main contractors, and internal project teams to ensure the effective integration of HVAC systems with other engineering and architectural disciplines.
- Supervise on-site installations, monitor daily work progress, and strictly enforce site safety and quality control standards.
- Oversee equipment and material procurement, evaluate vendor submissions, and manage subcontractor performance.
- Conduct regular site inspections, actively participate in project meetings, and prepare accurate site progress documentation.
- For the Managerial role: Lead, mentor, and direct a team of engineers and supervisors, taking ownership of the overall project schedule, resource allocation, and operational performance.

Key Requirements

- Degree or Diploma in Mechanical Engineering or a related technical discipline.
- Minimum of 3 to 5 years of relevant experience in HVAC/ACMV building services for the Engineer role; 8+ years of experience with a proven track record in project leadership for the Manager role.
- Strong working knowledge of local mechanical codes, statutory regulations, and industry safety standards.
- Proficiency in relevant engineering and drafting software (e.g., AutoCAD; experience with BIM/Revit is a strong advantage).
- Excellent analytical and problem-solving skills with a proactive, hands-on approach to resolving site-specific technical challenges.
- Exceptional communication and interpersonal skills, capable of collaborating effectively in a fast-paced, multidisciplinary environment.

Apply online or feel free to contact me directly for more information about this opportunity. Due to the high volume of applicants, we regret to inform that only shortlisted candidates will be notified. Thank you for your understanding.
