Job Description

We are seeking a proactive and analytical System Analyst to support and enhance business-critical applications. The ideal candidate will bridge business and technical teams, ensuring system reliability, continuous improvement, and successful delivery of technology solutions that support operational excellence.

Responsibilities

- Analyze business requirements and translate them into functional specifications, system enhancements, and process improvements.
- Coordinate with business users, developers, and external vendors throughout the system development lifecycle.
- Manage testing activities, including system testing, UAT coordination, and documentation preparation.
- Provide application support, troubleshoot incidents, monitor system performance, and ensure service continuity.

- Support system integration projects and application rollouts while maintaining compliance with IT standards and security policies.

Qualifications

- Bachelor's degree in Computer Science, Information Technology, or a related field, with 3+ years of experience in System Analysis or Application Support.
- Strong knowledge of web applications, APIs, system integration, and database technologies such as SQL or Oracle.
- Experience in requirements gathering, system documentation, process analysis, and UAT management.
- Familiarity with Java and React technologies; knowledge of AI tools, technologies, or integrations is a plus.
- Strong analytical, problem-solving, communication, and stakeholder management skills with good English proficiency.

Interested candidate, please submit your most recent resume in English by simply clicking “APPLY NOW’
